EXPERIENCE

Termux Packages – *Open Source Collaborator*

APR 2023 – PRESENT

- Contributed to package maintenance, automation, and CI/CD integration.
- Streamlined update processes to improve package stability, benefiting thousands of Termux users.

Freelance – *Freelance Developer*

FRB 2023 – APR 2024

- Completed small freelance commissions, providing custom software solutions.
- Applied full-stack development best practices using the PERN stack.

PROJECTS

Photo Editor – *Vue, Typescript, CSS*

A simple photo editor that allows users to upload images, apply filters, and download the edited image.

Social Media App – *Svelte, Javascript, Tailwind*

A microblogging platform like Twitter.

- Implemented secure user authentication and authorization for account management.
- Created follow/unfollow functionality to build personalized user connections and community networks.
- Enabled users to create public and private posts (chirps), allowing for both personal and community-based content sharing.
