Objective

Aspiring junior developer with a strong foundation in open-source contributions and community problem-solving. Skilled in full-stack development, automation, and CI/CD practices, with experience across a range of technologies including Node.js, React, and Linux environments. Passionate about learning and contributing to a collaborative team, leveraging my technical knowledge and adaptability to deliver efficient, user-centered solutions.

Skills

- **Languages:** TypeScript, Python, C++, SQL
- **Frameworks/Libraries:** Node.js, React, Express
- **Tools:** Git, Docker, Redis, PostgreSQL
- **Other:** REST APIs, CI/CD, Linux, Automation, CLI, GUI Development

Experience

Open-Source Contributor

January 2023 - Present

- Actively contributed to multiple open-source projects, collaborating with maintainers and community members.
- Maintained automation tools for Termux packages repository, gaining CI/CD experience.
- Contributed to a large C++ package manager codebase, improving understanding of complex systems.
- Supported community by troubleshooting issues, sharing knowledge, and creating documentation.

Freelance Developer (Commissions)

Feb 2023 - Feb 2024

- Completed small freelance commissions, providing custom software solutions.
- Applied full-stack development best practices using the PERN stack.

Projects

Photo Editor

A simple photo editor that allows users to upload images, apply filters, and download the edited image.

- Implemented handling user inputs, handling file blobs, applying css filters to images.

Social Media App

A social media platform inspired by Twitter.

- User Authentication and Authorization
- Create public/private posts.
- Follow others, join communities
