PROJECTS

Chat App — *React, Express, Postgres, Socket.io*

- Implemented user authentication with login/register functionality and real-time messaging for seamless communication.
- Enabled profile updates and user search for connecting with others effectively.

Social Media App — *Svelte, Javascript, Tailwind*

A microblogging platform like Twitter.

- Implemented secure user authentication and authorization for account management.
- Created follow/unfollow functionality to build personalized user connections and community networks.
- Enabled users to create public and private posts, allowing for both personal and community-based content sharing.

EXPERIENCE

Termux Packages — *Open Source Collaborator*

APR 2023 - PRESENT

- Contributed to package maintenance, automation, and CI/CD integration.
- Streamlined update processes to improve package stability, benefiting thousands of Termux users.

Freelance — *Freelance Developer*

FEB 2023 - APR 2024

- Completed small freelance commissions, providing custom software solutions.
- Applied full-stack development best practices using the PERN stack.
